# School of Housing, Building & Planning

Envisioned and crafted in 1972 as a holistic school entrusted with nation building and national development, the School of Housing, Building and Planning (HBP), Universiti Sains Malaysia (USM) opened its doors to the first batch of enrolled students in 1973. 50 years on, HBP has matured into a multi-disciplinary built environment institution that seamlessly entwines 7 fields of study into one comprehensive learning and teaching experience that is strong in fundamentals but mercurial in adapting to change, innovation and dynamism. The school has made tremendous progress in teaching, research, consultancy and publication.

Currently, there are seven undergraduate programmes offered by the school. They are recognized by the respective professional bodies such as the Board of Town Planners Malaysia (LPBM), Board of Architects Malaysia (LAM), Board of Quantity Surveyors Malaysia (BQSM), Royal Institution of Chartered Surveyors (RICS), Royal Institution of Chartered Surveyors Malaysia (RISM), and Chartered Institute of Building (CIOB).

## Vision

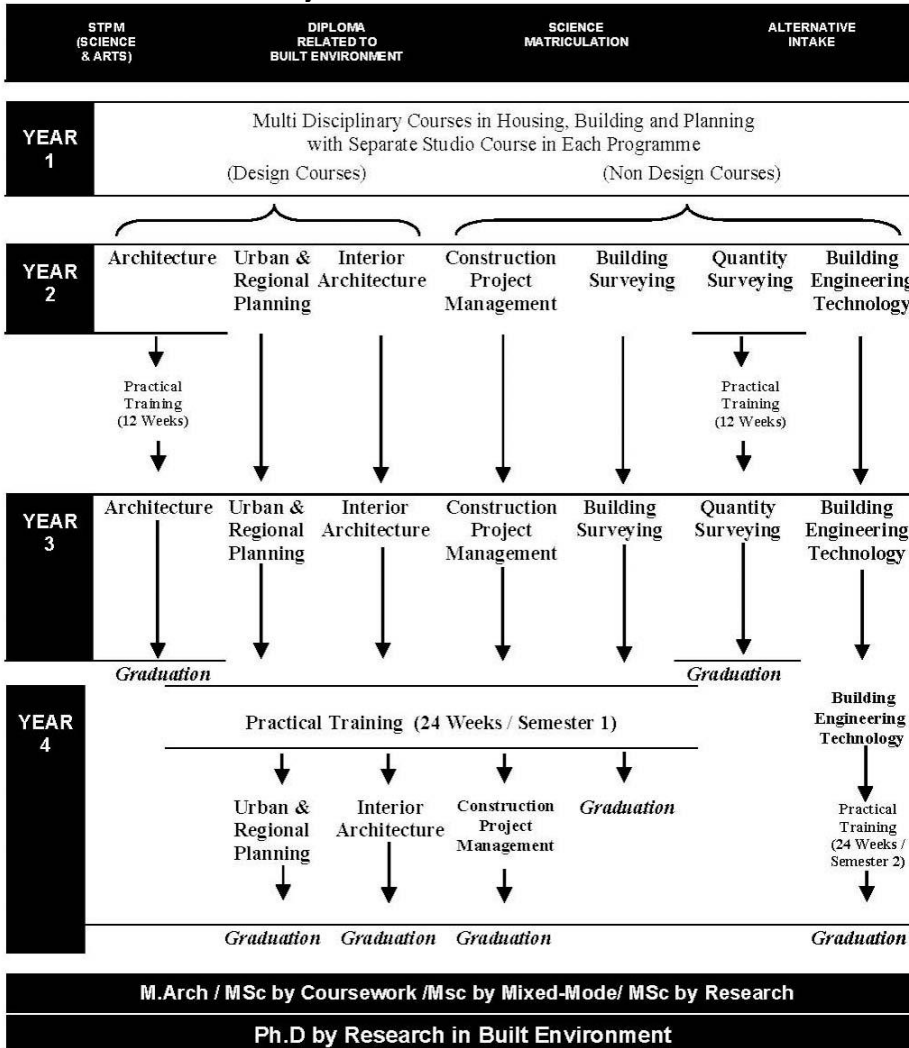

'Championing a sustainable future through comprehensive education and embracing a global perspective'

## Mission

HBP as a prominent institution in the field of built environment education, cultivating transdisciplinary interconnectivity and committed to championing sustainability.

# Study Path at The School of HBP

# Programme Structure/Curriculum at HBP

The School of Housing, Building and Planning (HBP) offers a curriculum that is unique amongst programmes of advanced education dealing with the built environment. Whereas curricula in Architecture, Interior Architecture, Building Surveying, Urban & Regional Planning, Construction Project Management, Building Engineering Technology or Quantity Surveying are generally based upon a professional training in one of these disciplines. The School eschews professional specialism in favour of a broadly based education cutting across both professional and disciplinary boundaries. As such, it is more correct to describe the broad focus of education at the School as a field of knowledge and skills, rather than the more narrowly focused concept of a single discipline. The students of HBP at the main campus USM Penang and Offshore Programmes therefore draw upon many different disciplines during the course of their studies, in so far as they are all relevant to the activities of Housing, Building and Planning. These theoretical and practical components are grouped in the curriculum according to the following categories:

1. Courses in theory and methodology
2. Studio projects
3. Laboratory projects
4. Practical training
5. Research

## 2.0 URBAN AND REGIONAL PLANNING PROGRAMME

The Urban and Regional Planning Programme has been offered since 1973, and to date, it has produced more than 1,500 graduates. The Programme has been restructured to produce skilled and trained graduates in line with the Built Environment industry's requirements and demands.

Bachelor of Urban and Regional Planning (Honours) is a 4-year degree programme accredited by the Board of Town Planners Malaysia (*Lembaga Perancang Bandar Malaysia - LPBM*) and the Malaysian Qualification Agency. The programme is a transdisciplinary Built Environment learning programme that aims to produce skilled and trained Urban and Regional Planning graduates. Subjects offered in this Programme cover theories and technical and practical aspects related to physical, social, economic and environmental planning. Urban and Regional Planning undergraduate programme at USM prepares the future talents and skills to meet the industry requirements, especially in ethical practice, planning laws and regulations, technical department requirements, feasibility and market study, and development plans at federal, state and local levels. Interpersonal communication and computing skills are essential to craft visual representations of the vision of future cities and to deliver impactful presentations.

### 2.1 Courses

Students of Urban and Regional Planning at HBP are required to complete **143** units of courses to meet the graduation requirements. The courses are as follows:

- **Core Courses**—These courses are mandatory for all Urban and Regional Planning students, and they must obtain a pass. They contain the fundamental topics of the School's curriculum and are coded 'T'.
- **Elective Courses**—These are alternative or optional courses offered by the Programme or School. Students may choose recommended priority courses or those of their own choice. The code to be used is 'E'.
- **University Course**—Languages and co-curriculum courses are offered by other Schools at USM. The code to be used is 'U'.

## **2.7 Course Synopsis - Bachelor of Urban and Regional Planning (Honours)**

### **RPS 104 – Integrated Studio (Planning)**

Studio projects expose critical thinking and practice urban planning best practices, while train the skills in manual sketching, 2D 3D technical drawing and graphic communication. Students conduct site analysis, produce concept plan and translate design elements into a housing layout plan that includes sustainability characteristic and guided by related guidelines.

### **RPS 106 – Design Studio (Planning)**

The studio project focus on processes and principles or site planning for mixed development layout proposal. Using appropriate methods in site analysis, techniques and procedures involved in development plans as well as applying the planning standards in development proposal.

### **RPK 123 – Planning and Environment Conversation**

This course covers aspects of environmental planning, management and conservation principles, planning process, and urban-rural land use concepts. Relationships between environmental quality and land use planning (urban and rural) will be studied. Analytical approach and control in planning, management and conservation taking into account social and physical factors will be given a special emphasis.

### **RPK 131 – Principles of Planning**

This course is related to the basic principles of planning practice including the process of preparing

layout plans, technical plans and development plans according to the procedures and requirements for planning permission applications; related to new urban planning, rural planning and urban redevelopment.

### **RPK 133 – Methods of Planning Analysis**

This course aims to enhance students' understanding of the quantitative and qualitative techniques and models employed in population, employment, income, land use, housing, commercial, recreation, transportation and traffic circulation. Students will analyse the dynamic relationships exist between attributes of overlapping concentrations in cities and regions to prepare feasible spatial plans for the community.

### **RPS 205 – Planning Studio 1**

This course prepares students with the knowledge on urban planning for the preparation of development proposal in the city area. It exposes students to the application of planning guidelines, technical requirements, practices of site evaluation, components of urban design and project costing for micro scale project. The course also focuses on research and spatial analytical skills whereby student's ability and skills to partake exercises such as gathering, mapping, analysing and synthesising of data will be enhanced and monitored. These processes are vital in determining the feasibility of the development proposals. Students will be assessed based on their ability to perform individually as well as in group.

### **RPS 206 – Planning Studio 2**

This course exposes students to the process of preparing development plans at regional level. It provides students with the understanding on different components of regional development in terms of the

linkages of various planning sectors. Examinations on the contents of National Physical Plan, State Structure Plan and Local Plan as well as consultation with stakeholders will be carried out to identify problems related to the feasibility of the policies and strategies. Students will apply planning analysis techniques to examine the problems at stake and provide solutions. The preparation of reports and plans sets the regional framework for the growth and development of the study area.

### **RPK 221 – Landscape Planning**

This course emphasizes on assessment techniques, planning, design, and the use of planting materials. It covers the relationship of human and its environment and problems associated with it; the approach and techniques in planning and assessing the landscape; and landscape design, theories and design principles within environment and social changes perimeters and framework.

### **RPK 223 – Tourism Planning and Development**

This course introduces basic understanding of tourism planning and development which covers the concepts, theories and models in tourism. An analysis of current issues and trends in sustainable tourism as well as impacts of tourism on economy, environment and socio-culture will also be covered.

### **RPK 232 – Urban Design**
